

quinta-feira, 11 de abril de 2024

1. No Windows Server ir a Tools -> Group Policy Management

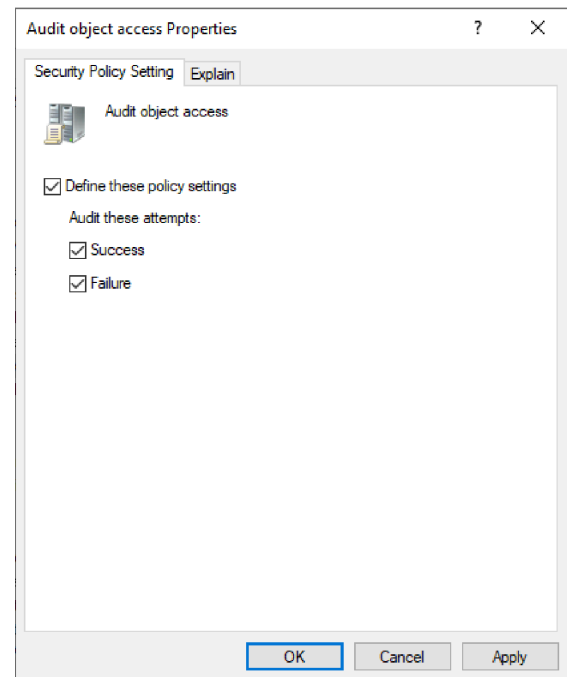

2. No Domain Controllers criar um GPO no meu caso "Auditoria 2" e selecionar "Edit" e seguir o seguinte caminho "Computer Configuration -> Windows Settings -> Security Settings -> Local Policies -> Audit Policy" e escolher "Audit object access".

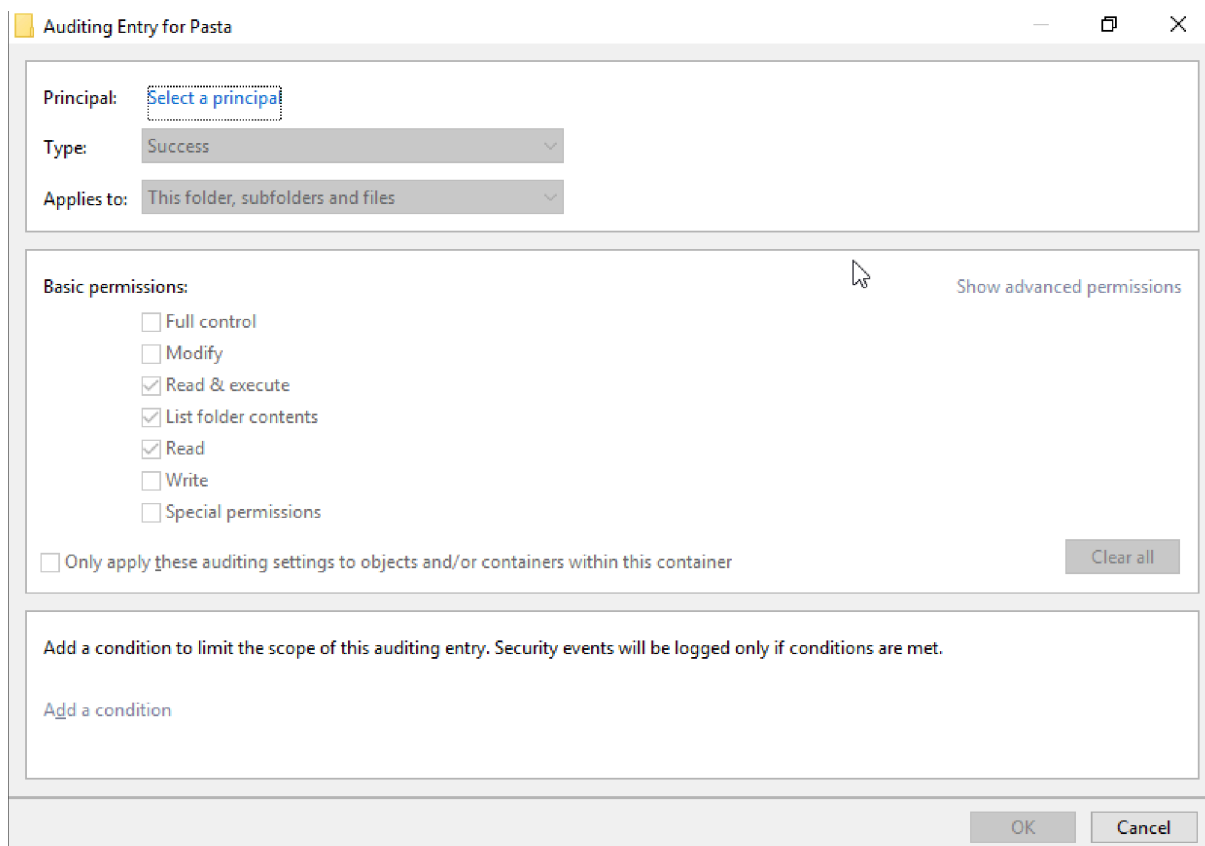

3. Neste ficheiro temos de ativar as opções:

- Define These policy settings
- Success
- Failure

E dar “Apply”.

4. Criar um Ficheiro no Disco e nas propriedades do ficheiro ir a “Security -> Advanced -> Auditing -> Add” que ira aparecer este display.

5. Nesta página iremos definir todos os utilizadores “Everyone” o Type “Fail” e em “Advanced permissions” iremos dar clear a tudo e escolher apenas “Delete” e “Delete subfolder and files” e aplicar.

Auditing Entry for Pasta

Principal: Everyone [Select a principal](#)

Type: Fail

Applies to: This folder, subfolders and files

Advanced permissions: [Show basic permissions](#)

<input type="checkbox"/> Full control	<input type="checkbox"/> Write attributes
<input type="checkbox"/> Traverse folder / execute file	<input type="checkbox"/> Write extended attributes
<input type="checkbox"/> List folder / read data	<input checked="" type="checkbox"/> Delete subfolders and files
<input type="checkbox"/> Read attributes	<input checked="" type="checkbox"/> Delete
<input type="checkbox"/> Read extended attributes	<input type="checkbox"/> Read permissions
<input type="checkbox"/> Create files / write data	<input type="checkbox"/> Change permissions
<input type="checkbox"/> Create folders / append data	<input type="checkbox"/> Take ownership

☐ Only apply these auditing settings to objects and/or containers within this container [Clear all](#)

Add a condition to limit the scope of this auditing entry. Security events will be logged only if conditions are met.

[Add a condition](#)

OK Cancel

6. No Windows Server ire-mos a “Tools -> Event Viewer” e seleccionar o caminho “Windows Logs -> Security” aparece uma display com as informações GPO que quando no cliente tentamos eliminar um ficheiro dentro da pasta partilhada irá dar um texto com o erro 4656 com a descrição do erro.
